DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Michael Bujold on 04/03/08.
3. The application has been amended as follows:
 - a. Claim 1, line 3: delete "at least one of".

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:
5. Both Corman and Altman disclose chords including a generally elongated main body having generally square cross section (Corman: "support post" 10, Fig. 1; Altman: "connector body" 40, Fig. 4) defined by four main walls surrounding a central bore and having four interior main surfaces (Corman: inner facing "bottom wall" 21, Fig. 1; Altman: back walls of "connector slots" 120, Fig. 4) and four exterior main surfaces (Corman: "side walls" 27 and 29, Fig. 1; Altman: "side surfaces" 150, Fig. 4), and a T-slot structure extending along and centered on each exterior main surface, each T-slot structure having an interior T-slot adapted to accept a bolt type fastener, each T-slot including a shaft slot extending inwards from an outer surface

of the T-slot structure and connecting with a cross slot extending at a right angle to the shaft slot at an inner end of shaft slot (Corman: "recesses" 11-14, Fig. 1; Altman: "connector slots" 120, Fig. 4).

6. Corman additionally discloses the features of the chord added in the amendment, including T-slot structures defined by two parallel slot side walls ("side walls" 16 and 17, Fig. 1) extending out in parallel from an exterior main surface ("side walls" 27 and 29, Fig. 1) and by two slot face walls extending inwardly from the slot side walls ("flanges" 18 and 19, Fig. 1).
7. Neither Corman or Altman disclose a forming strip with the specific claimed structure. Both also generally fail to teach strips that are formed to cooperate with the walls of the chord.
8. Sauer discloses a beam with the claimed shape of the forming strip, including a w-shaped cross-section, a face region, and an attachment region (Fig. 16). However, the beam of Sauer is not intended to be mated with a chord such as the ones disclosed by Corman and Altman. It would not be obvious to combine the two components in a system with the beam of Sauer abutting and mating with one of these chords. Any combination of Corman, Altman, and Sauer that arrived at the claimed invention would require improper hindsight.
9. All other prior art also fails to teach a forming strip shaped to mate with a chord in the claimed manner.
10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
